

Exciting **Information Systems Auditor** opportunity at The University of Texas Health Science Center at San Antonio.

This position works primarily as a team member to review basic to complex computer support systems and information systems technology related to all critical business functions in accordance with professional auditing standards and in compliance with applicable regulations, policies, and procedures.

You'll have the opportunity to assist in planning reviews, performing tests of basic to complex IT processes and controls, and evaluating information systems and operating procedures. You will also assess business risks and evaluate the effectiveness of controls at the network, operating system, database, and application level.

Through the use of logic and reasoning you'll identify the strengths and weaknesses of alternative solutions, conclusions, or approaches to problems. You will communicate with various levels of technical and non-technical management and staff regarding IT-related internal controls.

**Minimum Qualifications:** Bachelors degree in Computer Science, Management Information Systems, Information Technology, Business Administration, or Accounting with three years of relevant audit experience, including at least 2 years IT audit, or other IT-related work experience. CISA, CIA or equivalent professional certifications are a plus.

The University of Texas Health Science Center at San Antonio is one of the leading research institutions in Texas and one of the major health sciences universities in the world. With an operating budget of \$753.4 million, the Health Science Center is the chief catalyst for the \$16.3 billion biosciences and health care sector in San Antonio's economy. The Health Science Center has had an estimated \$37 billion impact on the region since inception and has expanded to six campuses in San Antonio, Laredo, Harlingen and Edinburg. More than 26,750 graduates (physicians, dentists, nurses, scientists and other health professionals) serve in their fields, including many in Texas. Health Science Center faculty are international leaders in cancer, cardiovascular disease, diabetes, aging, stroke prevention, kidney disease, orthopedics, research imaging, transplant surgery, psychiatry and clinical neurosciences, pain management, genetics, nursing, dentistry and many other fields.
